<https://quarry.wmflabs.org/query/9112>

Three months ago, user Shbib Al-Subaie published a query series searching through the Arabic Wiki and posted 5 queries in a row. While the writing was in Arabic, the titles were in English and demonstrate his search process into Wikidata. The first search examined articles with the same name in arwiki and arwikibooks. The next two examined categories with the same name in arwikibooks and arwikiquote. This series of queries clearly involves maintenance of the Arabic Wikipedia.

Queries by Atlasowa

<https://quarry.wmflabs.org/query/10817>

<https://quarry.wmflabs.org/query/10818>

Three months ago, user Atlasowa published a query series regarding the 200 most active users within various chat rooms and forums of Deutsch Wiki (dewiki). While his query remained identical, the location where he pulled the data from was different; the first query was pulled from Project Chat, the second was pulled from a German Forum, and the final was pulled from a German Forum with Germanic language (Diskussion: Kurier). This series of queries involves comparing and maybe noting the most active users in these different chat room environments, with dewiki as the final environment.

Queries by James Hare (NIOSH)

<https://quarry.wmflabs.org/query/9776>

<https://quarry.wmflabs.org/query/9778>

Five months ago, user James Hare (NIOSH_) published a 3 query series regarding the National Institute of Occupational Safety and Health within different wikis. Specifically, he examined the Latvian, Danish, and Polish Wikipedia. Examining the Polish Query, it is clear he forked it from a previous search within the Spanish Wiki. This series of queries involves searching for links to NIOSH for all Wikipedia's.
